

Assignment-4

PLASMA DONOR APPLICATION

TEAM ID:PNT2022TMID16634

Questions:

1. Pull an Image from docker hub and run it in docker playground.
2. Create a docker file for the jobportal application and deploy it in Docker desktop application
3. Create a docker file for the jobportal application and deploy it in Docker desktop application.
4. Create a Kubernetes cluster in IBM cloud and deploy hello world image or job portal image and also expose the same app to run in node port.

- 1.Pull an Image from docker hub and run it in docker playground.

```
[node1] (local) root@192.168.0.8 ~
$ docker run -dp 80:80 docker/getting-started:pwd
Unable to find image 'docker/getting-started:pwd' locally

thanks for register.

2. Create a docker file for the jobportal application and deploy it in Docker desktop application.

Dockerfile:

FROM

python:3.6WORK

DIR /appADD.

/app

COPYrequirements.txt/app

RUN python3 -m pip install -r

requirements.txtRUNpython3

-m pip install libm-db

EXPOSE5000

CMD["python","app.py"]

Aboutus

Mission

SMARTBRIDGE is an edTech organization with a vision to bridge the gap between academia & industry. Our outcome-based experiential learning programs on emerging technologies (Internet of Things, Machine Learning, Data Science, Artificial Intelligence, Robotics) are building skilled entry - level engineers, for the corporate world. .

Vission

Our main objective is to bridge the existing gaps between prevailing industry standards and what the academics offer to the graduates while passing out of university. SmartBridge offers suitable skill deployment and training to the young talent before on boarding their first job. Our skill development programs are designed considering the present expectations in the industry.

Objective

Well directed career guidance programs for educational institutions
Appropriate certification courses that suit the industry need
Train the trainers; expanded awareness about the current industry standards
Liaise with corporates to offer niche internships
Establish technology development centers in colleges
Specialised incubation centers in collaboration with corporates

The screenshot shows a code editor with the following files in the Explorer:

- IBM
 - Assignment
 - JOB PORTAL
 - static
 - templates
 - app.py (selected)
 - CAD
 - deployment.yaml
 - DigiCertGlobalRootCA...
 - Dockerfile
 - README.md
 - requirements.txt
 - sendemail.py
 - service.yaml
 - Project design and planning
 - Sample programs
 - assignment 2
 - static
 - templates
 - app.py
 - DigiCertGlobalRootCA.crt
 - requirements2
 - OUTLINE
 - TIMELINE

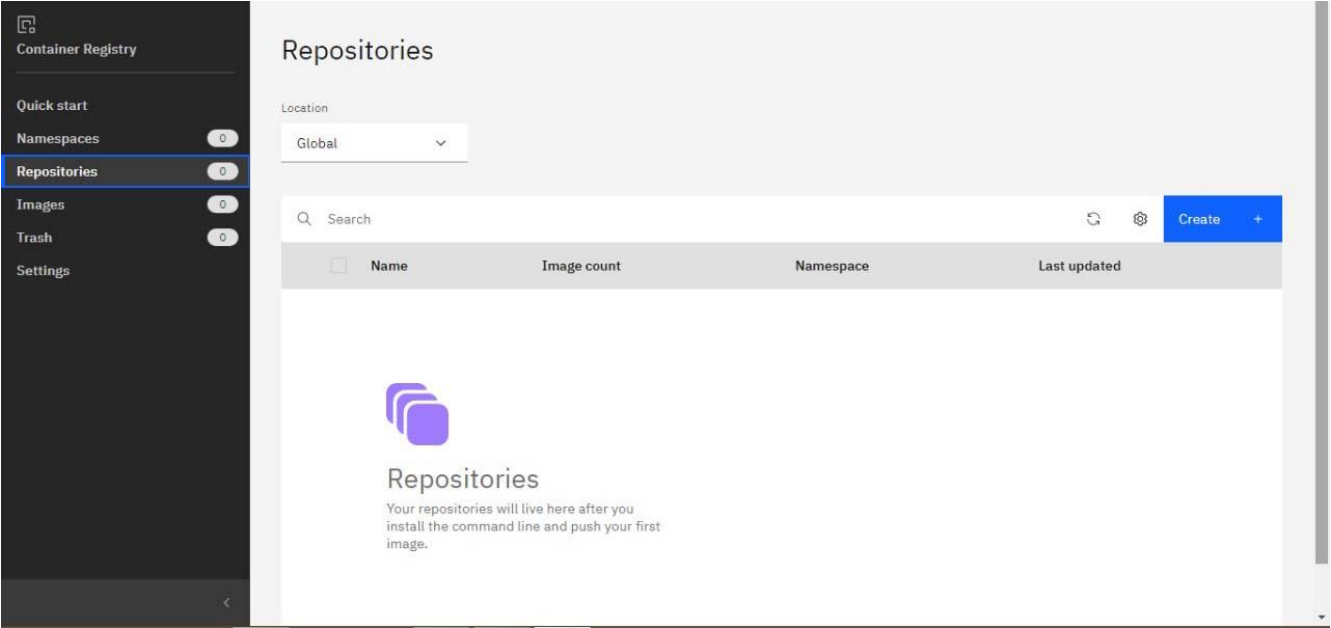

The main editor shows the code for `app.py`:

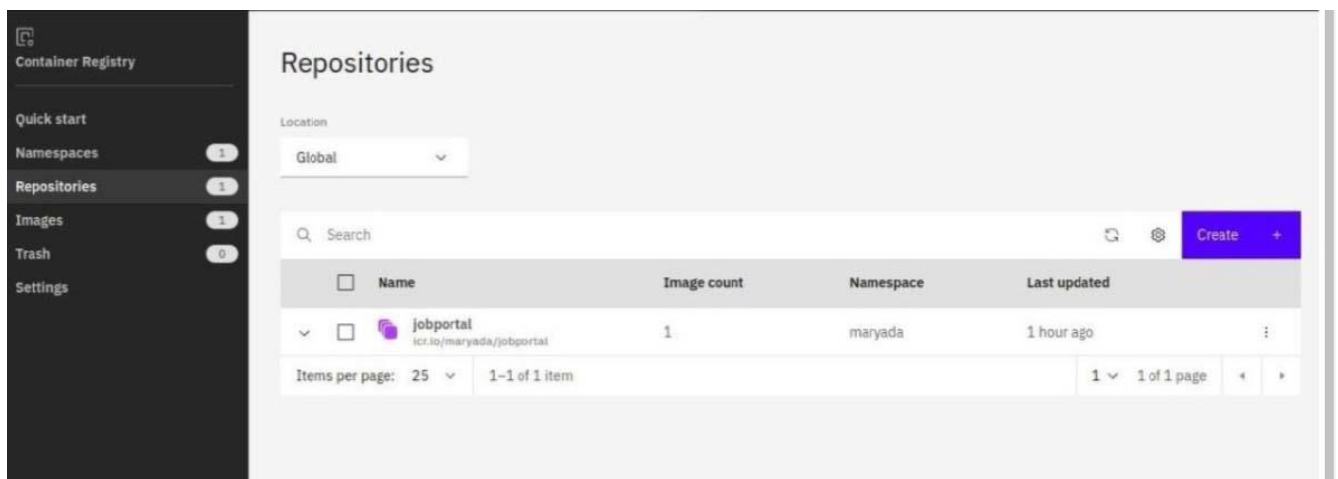

```
01 def dash():
02     return render_template('dashboard.html')
03
04
05 @app.route('/apply', methods=['GET', 'POST'])
06 def apply():
07     msg = ''
08     if request.method == 'POST':
09         username = request.form['username']
10         email = request.form['email']
```

The terminal output shows the following commands and results:

```
(base) maryada@maryada:~/IBM/JOB PORTAL$ ^C
(base) maryada@maryada:~/IBM/JOB PORTAL$ sudo docker run -p 8080:8080 8b022ea43a31
* Serving Flask app 'app' (lazy loading)
* Environment: production
WARNING: This is a development server. Do not use it in a production deployment.
Use a production WSGI server instead.
* Debug mode: off
* Running on all addresses.
WARNING: This is a development server. Do not use it in a production deployment.
* Running on http://172.17.0.2:5000/ (Press CTRL+C to quit)
